Landscape Architecture - Urban Planning - Land Development

Albany Downtown Riverfront Masterplan Project

The goal of this project was to evaluate the city of Albany's Visual Landscape Resources; Tourism and Sightseeing Opportunities; Traffic, Transportation, and Parking; and the Environmental and Archeological factors which affect the area's economic development opportunities. This six month study will result in the development of a variety of new projects for downtown Albany and the river front corridor. The masterplan will unify both the design and implementation of these new projects and the previous projects planned within the Flint River Corridor and adjoining neighborhoods between Chehaw Park and Oakridge Drive. Examples of the Proposed New Projects include:

- Riverside Drive
- Biking & Hiking Trail System
- River Center
- New & Rehabilitated Retail
- Harlem Business District Revitalization
- New Streetscapes
- Civil Rights Walk
- Historic Preservation
