Piedmont Park Combined Sewer Overflow Project

*Plan View: Phase II Clear Creek
Environmental Center*

As part of the overall execution of the new Combined Sewer Overflow project within historic Piedmont Park, we assisted in the Renovation, Land Use Planning, Landscape Design, and Construction Documentation for the phase one improvements along the existing 10th Street extension of the park. We also provided design documentation for the second and third phases of the project which include the new parkland site for the CSO building, and the continuation of the park along Piedmont Avenue.

Agency: Bureau of Pollution Control, The City of Atlanta

Plan View: Phase I 10th Street improvements
